

# SQL Developer Connection Details

The screenshot shows the 'New / Select Database Connection' window. On the left is a table with columns 'Connection Name' and 'Connection Details'. To the right of the table are input fields for 'Connection Name', 'Username', and 'Password', along with a 'Save Password' checkbox. Below these is the 'Oracle' section, which includes a 'Connection Type' dropdown set to 'Basic', a 'Role' dropdown set to 'default', and fields for 'Hostname', 'Port', and 'SID' (which is selected with a radio button). There is also a 'Service name' field. At the bottom of the Oracle section are three checkboxes: 'OS Authentication', 'Kerberos Authentication', and 'Proxy Connection'. The bottom of the window features a 'Status:' label and a row of buttons: 'Help', 'Save', 'Clear', 'Test', 'Connect', and 'Cancel'.

To connect to Oracle database, please enter the following information in the different fields of the **New / Select Database Connection** window shown in the above image.

- **Connection name** may be any name you wish to assign
- **Username** is your *authcate username*
- **Password** (your Oracle server password, not your authcate password) *will be supplied by your tutor during your lab class.*
- **Hostname** is fit2094.corp-prd.aws.monash.edu
- **Port** is 1521
- **SID** (System **ID**entifier) is **FIT2094**
